EDUCATION

Florida International University

Bachelor's Degree in Computer Science – Software Engineering Track

Spring 2017 – Fall 2020

- Founded and led the Immersive Technology Club, mentoring students to develop innovative XR applications and driving forward cutting-edge immersive technology initiatives.

EXPERIENCE

Oberon Technologies

March 2023 – Current

XR Software Engineer

- Established and maintained robust CI/CD pipelines using Jenkins, ensuring seamless integration and delivery in XR software development.
- Engineered and deployed immersive training software using Unreal Engine and Unity for VR, AR, and flatscreen applications.
- Led cross-functional project teams, managing tasks, timelines, and deliverables to meet critical milestones.
- Collaborated with clients to analyze requirements, adjust project scopes, and deliver customized, scalable training solutions.

AEXLAB

May 2022 – Jan 2023

Gameplay & Tools Programmer — Vail VR

- Developed and optimized networked multiplayer experiences using UE4 C++/Blueprints for a title released on PCVR (Steam) and Meta Quest.
- Implemented gameplay features and enhanced visual effects, boosting performance and user engagement.
- Created custom engine tools for workflow automation, reducing development cycle times.
- Refined gameplay systems through iterative user feedback to improve mechanics and immersion.

Southern Company

June 2021 – Mar 2022

VR Developer — McDonough Ammonia Training Simulation

- Transformed a VR prototype into a production-level training simulation using Unreal Engine, ensuring robust performance.
- Standardized best practices in modeling, animation, and audio pipelines to elevate production quality.
- Collaborated with clients to conceptualize and design interactive VR mechanics aligned with training objectives.
- Executed agile sprint cycles, integrating user feedback to continuously enhance simulation accuracy.

Unity College

Apr 2021 – Sep 2021

AI/Data Analyst Consultant

- Developed and delivered a comprehensive presentation outlining emerging trends in AI and Data Analytics, with actionable strategies to integrate advanced technologies in education.
- Collaborated with third-party vendors to design and implement analytical dashboards that enhanced data-driven decision-making and performance tracking.

Unity College

Mar 2021 – May 2021

VR Developer — Virtual Forest & 3D Authoring Tool

- Supported development teams in integrating VR applications using Unity for cross-platform compatibility.
- Engineered web access and tutorial level features, and designed a mobile VR-ready forest environment optimized for Meta Quest.
- Advised on third-party asset integration and technical design to boost project scalability and performance.

Florida International University

Nov 2017 – Dec 2020

VR Developer — Fire360 Incident Command Simulator

- Collaborated with the City of Miami Fire Department and FIU's International Disaster Preparedness Academy to design an immersive VR firefighter training simulator.
- Executed real-time tasks including gameplay mechanics, 3D modeling, texturing, animation, VFX, and performance optimizations using Unity.

- Delivered technical support and mentorship to both graduate and undergraduate teams for effective VR technology integration.

Realities Future LLC

Sep 2019 – Mar 2020

VR Developer — Co-Location Prototype

- Led R&D initiatives to develop a refined demo prototype with a team of three, showcasing advanced VR capabilities.
- Evaluated and enhanced Oculus Quest tracking hardware integration by developing a prototype using Unreal Engine, the VR Expansion Plugin, and Antilatency hardware.

Helm Systems

May 2018 – Aug 2019

VR Developer — Soulkeeper VR

- Developed core game mechanics, AI programming, and performance optimizations for a PCVR RPG title using Unreal Engine.
- Demonstrated innovative VR solutions at trade shows and public events, engaging industry stakeholders.

TECHNICAL SKILLS

Graphics Editing: Adobe Photoshop, Krita, GIMP

3D Modeling: Blender, Gravity Sketch

Audio/Video Editing: Audacity, Sony Vegas Pro

Programming Languages: C#, C/C++

Source Version Control: Perforce, TortoiseSVN, GitHub

Real-time Simulation Engines: Unreal Engine 4, Unity Engine
